Syngenta

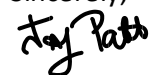

Dear Syngenta recruiter,

I am Jay Patel, and I am interested in the Cybersecurity Internship at Syngenta. I am pursuing a Bachelor of Science degree and specializing in Cybersecurity at Illinois State University. I am a very open and approachable person. I do well in social situations, and I am tri lingual. I speak Gujarati, Hindi, and English. Due to my interest in technology, I was hooked on your work; Development of new innovations for better agriculture sounds very interesting. I have always been a big fan of technology and I think your company can benefit from my skills and work ethic. I think I would be a benefit to your IT-security team with my skills and experience in cybersecurity as referenced in my resume. I can also code in Java, Python and SQL so I would be able to keep up and understand the developers.

Action movies and passion in technology led me to grow interest in Cybersecurity. I can set up new users in active directory, knowing which group they belong to and what kinds of access they are cleared for (RBAC), setting up onetime passwords so the user is prompted to change their password on first log in, resetting passwords, locking, and unlocking users. I have experience in hardening Linux and windows systems. Encrypting files and emails with open SSL. I also learned how to control network traffic through modifying the firewall of a device. I aim to bolster security, reduce the risk of an attack, keep security from being an obstacle to the users, and automating as much as possible to achieve lower costs, tighter security, easier compliance, and higher efficiency.

I will continue to grow and develop more skills that can help us achieve our goals. My resume is attached demonstrating my skills and experiences that qualify me for this opportunity. I look forward to hearing from you soon. I am also looking for a future hire after the internship because I like being a part of a company that shares the same goals as me and is helping solve the issue of feeding the population. My contact information is above or on my resume, and I can be reached via email or phone. Thank you for considering me as a candidate.

Sincerely,

Jay Patel
